BROCHURE

About Us

At **Kashvi Agency**, we are dedicated to providing cutting-edge CCTV and security surveillance solutions designed to protect what matters most. **Kashvi Agency** has been a trusted name in the security and technology solutions industry, delivering comprehensive and innovative systems to enhance the safety, efficiency and comfort of our clients. With **12 years of experience** in the security industry and **8 years as a trusted, independent provider**, we've built a reputation for excellence, reliability, and innovation.

Vision

"Drive forward-thinking solutions for a safer and more sustainable world."

Mission

"Innovate to enhance global understanding, empower leaders, and collaborate for safety and sustainable development".

Our Expertise

At **Kashvi Agency**, we specialize in a wide range of cutting-edge technologies, including:

- **CCTV Security Solutions:** Offering state-of-the-art video monitoring solutions tailored to meet the needs of businesses and homes.
- **Biometric Access Control Solutions:** Providing advanced access management systems to ensure secure and controlled entry.
- **Video Door Phone Solutions:** Enhancing safety and convenience for homes and businesses.
- **Smart Door Lock Solutions:** Modern and secure locks designed to provide keyless access and enhanced security.
- **Intercom System Solutions:** Streamlined communication solutions for offices, residential complexes, and
- institutions.
- **Intrusion Solutions:** Protecting your property from unauthorized access with high-grade alarm systems.
- **Fire Alarm Solutions:** Reliable and fast-responding alarms to ensure the safety of people and property.
- **Inverter & Solar Panel Solutions:** Sustainable energy solutions for uninterrupted power supply and eco-friendly energy alternatives.
- **Home Automation Solutions:** Smart home solutions that give you control over lighting, appliances, and more at your fingertips.
- **Home Theatre Solutions:** Complete entertainment solutions for immersive audio-visual experiences.
- **Public Address (PA) System Solutions:** High-quality audio systems for public announcements and communication in industries, Hospital, Education institution & Public Events.
- **Nurse Call System Solutions:** Seamless communication systems for healthcare environments to enhance patient care.
- **Interactive Panel Solutions :** Engaging digital display systems for schools, businesses, and more.
- **Commercial & Consumer Display Solutions (Tv's) :** High-quality display systems for business and personal entertainment.
- **GPS Tracking Solutions :** Offering accurate and reliable GPS solutions for vehicle and asset tracking.

CCTV SECURITY SOLUTIONS

A CCTV (Closed-Circuit Television) system with AI integration is a video surveillance system that monitors and records activities in real-time, using cameras connected to a central system. AI enhances the system by enabling features such as facial recognition, object detection, behavior analysis, and motion tracking, allowing for automated alerts, improved accuracy, and smarter security management. This makes it more effective in identifying potential threats and providing advanced analytics for security purposes.

BIOMETRIC SOLUTIONS

A biometric attendance device is a system that tracks employee attendance using biometric data like fingerprints, facial recognition, or palm scans. It ensures accurate timekeeping by verifying identity through unique physical characteristics.

ACCESS CONTROL SOLUTIONS

An access control device regulates entry to secure areas by using methods such as Access cards, (RFID, MIFARE)   fingerprint or facial recognition, and EM cards. It ensures only authorized individuals can access restricted spaces.
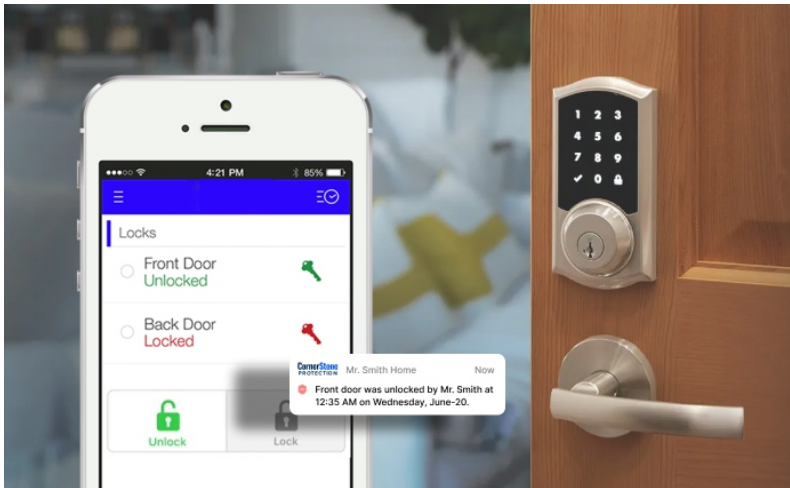

VIDEO DOOR PHONE SOLUTIONS

A video door phone is an intercom system that includes a video component, allowing users to see and communicate with visitors at their door via a video screen. It typically consists of an outdoor unit with a camera, Speaker and microphone, and an indoor unit with a display screen, Microphone and speaker. This system enables homeowners to identify and converse with visitors before granting access, enhancing security and convenience.

SMART DOOR LOCK SOLUTIONS

Mobile access Smart locks can connect to a mobile app, allowing you to lock and unlock your door from anywhere in the world with an internet connection, as well as keep track of how often household members or guests are coming and going.

INTERCOM SOLUTIONS

An intercom system is a communication device that allows individuals in different locations within a building or area to speak to each other. It typically consists of wall-mounted units or handheld devices and can include audio, video, or both. Intercoms are commonly used for security and access control areas.

INTRUSION ALARM SOLUTIONS

An intrusion alarm system is a security device designed to detect unauthorized entry into a protected area. It uses various sensors such as motion detectors, door/window sensors, glass break sensors, and vibration sensors to monitor the environment. When a sensor detects suspicious activity, the system triggers an alarm to alert occupants or security personnel.

FIRE ALARM SOLUTIONS

A fire alarm system is a safety device designed to detect and alert occupants of a building to the presence of smoke, heat, or fire. It typically includes smoke detectors, heat detectors, manual pull stations, alarm sounders, and a control panel. When a fire is detected, the system activates alarms, notifies emergency services, and can trigger other safety measures such as sprinklers or emergency lighting to ensure a quick and safe evacuation.

INVERTER & SOLAR PANEL SOLUTIONS

An inverter is one of the most important pieces of equipment in a solar energy system. It's a device that converts direct current (DC) electricity, which is what a solar panel generates, to alternating current (AC) electricity, which the electrical grid uses.

HOME AUTOMATION SOLUTIONS

Home automation refers to the use of technology to control and automate various household systems and devices. This includes managing lighting, heating, cooling, security systems, appliances, and entertainment systems through a central control interface, often via smartphones, tablets, or voice commands. The goal of home automation is to enhance convenience, energy efficiency, and security while providing greater control over the home environment.

HOME THEATRE SOLUTIONS

Home theatre solutions refer to the equipment and setup designed to recreate a cinema-like experience at home. This typically includes a high-quality display (TV or projector), a sound system (soundbar or surround sound), and source devices (streaming devices, Blu-ray players). The goal is to enhance the audio and visual experience for watching movies and TV shows.

PA SYSTEM SOLUTIONS

A PA (Public Address) system is an electronic sound amplification system used to broadcast audio messages to a large audience. It typically consists of microphones, amplifiers, and loudspeakers to deliver clear sound across large areas such as schools, airports, stadiums and public events. PA systems are used for making announcements, emergency alerts or playing music.

GPS SOLUTIONS

The global positioning system (GPS) is a network of satellites and receiving devices used to determine the location of something on Earth. Some GPS receivers are so accurate they can establish their location within one centimeter (0.4 inches). GPS receivers provide location in latitude, longitude, and altitude.

INTERACTIVE PANEL SOLUTIONS

An interactive panel is a touch-sensitive screen that allows users to interact directly with digital content through gestures or inputs. It can be used for a variety of applications. It is a touch-sensitive screen that allows users to interact with digital content through direct touch inputs. It's commonly used in education, business, and public information systems.
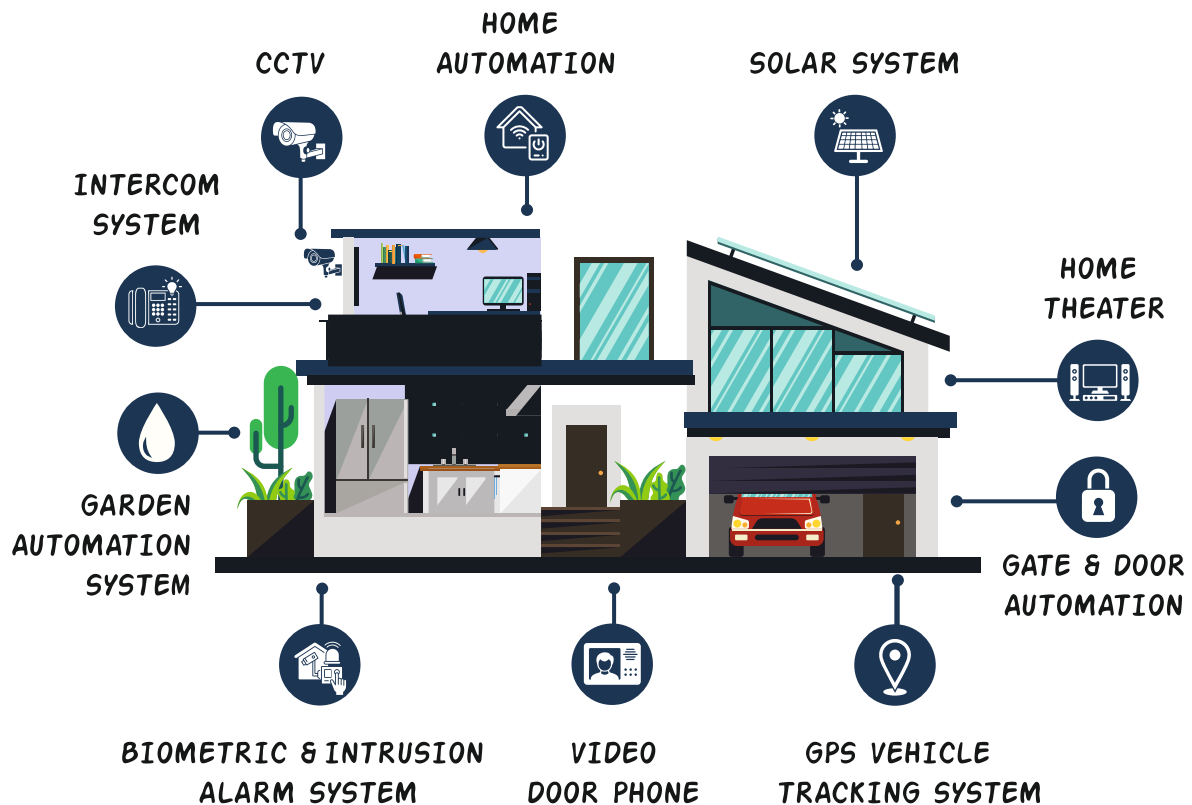

NETWORK SOLUTIONS

Networking is the process of connecting computers are network devices together to allow systems to share resources and information.

NURSE CALL SYSTEM SOLUTIONS

Nurse Call Systems are advanced communication systems used in healthcare facilities. They allow patients to alert medical staff in case of an emergency or need for assistance.
